

Greystone Foundation Awarded \$5,000!

Mission: To identify and provide short-term financial assistance to individuals and families who have experienced an unexpected event disruptive to household finances.

Program Funded:

The Greystone Foundation will use these funds to provide short-term direct financial assistance to individuals and families who experience unexpected events that disrupt household finances. Direct assistance consists of the payment of household service providers or the provision of emergency cash. According to Greystone, their timely assistance avoids eviction, repossession, collections, negative credit reports, or service interruptions. Typical expenses paid on behalf of eligible clients include mortgage, rent, utilities, car payments, municipal vehicle taxes, auto insurance, mobile phone and internet services, medical bills, and credit card bills. Greystone pays these expenses to landlords, financial companies, and service providers directly rather than providing funds to clients. Therefore, the grant will not go towards the foundation's operating expenses, which are covered entirely by internal funding. Instead, all grant support funds will be used exclusively for direct client benefits.

This award will directly benefit a substantial number of Farmington residents. It will aid in providing community members in need with monetary assistance and important financial advice from the Greystone Foundation's highly experienced, qualified, and dedicated staff.
